

# Silicone Color

Decorative sealant for ceramics, mosaics and swimming pools.

Silicone Color develops a high degree of adhesion to non-absorbent surfaces, guaranteeing the integrity and watertightness of ceramic and porcelain coverings subject to deformation.

## Rating 3

1. Suitable for porcelain and ceramic tiles, low thickness slabs
2. Suitable for swimming pools and for permanent contact with water
3. Resistant to chemical substances
4. Resistant to ageing, UV light and frost
5. Suitable for damp environments
6. High chromatic stability
7. Available in 50 colours

- × Regional Mineral  $\geq 30\%$
- ✓ VOC Low Emission
- × Solvent  $\leq 5$  g/kg
- ✓ Low Ecological Impact
- ✓ Health Care

---

## Areas of application

- Elastic, waterproof sealing of expansion and connection joints on:
- porcelain tiles, low thickness slabs, ceramic tiles, klinker, cotto, glass and ceramic mosaic, of all types and formats
  - bathroom fittings, showers
  - metal doors and windows
  - glass and fibreglass

→ Intended use:

For internal and external use, including environments subject to freezing, on fractionizing, expansion and connection joints of coverings on balconies, terraces, internal floors and swimming pools.

Do not use on natural stone, cement-based substrates, rubber, plastic and bituminous components or materials that weep oils, solvents and plasticizers. It is recommended that a test be carried out before application on sensitive metal surfaces such as copper, silver and relevant alloys. In the realisation of joints subject to abrasion. To create concrete facades.

---

## Instructions for use

→ Preparation of substrates

The sides of the joints to be sealed must be perfectly dry, clean and free from any traces of grease, dust or rust. Remove all flaky or loose parts and carefully remove rust from metals. When preparing visible joints, and in order to achieve a clean sealing line, the user should cover the edges with protective masking using normal adhesive tape. The use of Keragrip Eco Pulep on metal surfaces optimises the cleanliness of the surface and the adhesion of the product to it.

→ Preparation

Silicone Color is ready-to-use. After cutting the conical nozzle of the cartridge, cut the spout at an angle of 45° to suit the width of the seal to be realized and screw it onto the cartridge. Insert the cartridge in the special pneumatic friction gun.

→ Application

Areas close to joints must be protected with masking tape to prevent substrates from being contaminated and to ensure even sealing. Remove masking tape immediately after smoothing the sealant. Make sure the silicone has been compacted deep into the joints to ensure optimum adhesion. To achieve a perfect finish, pass a metal or plastic spreader soaked in soapy water over the surface in one, continual movement if possible.

For long-lasting sealing, capable of withstanding expansion and contraction stress, the following conditions are necessary:

- the joint is applied so that movement will not exceed 25% of joint width
- the ratio between width and sealant depth is between 1 and 2
- the sealant adheres only to the sides of the joint and not to the substrate. Use Joint polyethylene foam sub-joint layer to adapt depth and prevent adhesion to the surface.

→ Cleaning

Residual traces of sealant can be removed with common solvents. Once hardened, Silicone Color can only be removed by mechanical means.

---

## Special notes

- Do not use in completely closed areas as the product will polymerise in atmospheric humidity.
- Brush the joint within 5 minutes after application to ensure the best contact between sealant and substrate.
- A base coat is normally not necessary. Specific substrates (porous or made of plastic materials) may require the use of an adhesion promoter to ensure maximum adhesion. This product is recommended for all situations at risk from dust.
- Silicone Color is non-paintable.

## Certificates and marks

---

## Abstract

Elastic and waterproof sealing of expansion-deformation joints will be carried out with an eco-friendly, silicone, acetic, organic sealant with a high level of elasticity, GreenBuilding Rating 3, CE-marked and compliant with the performance requirements indicated in Standard EN 15651, part 1, 2, 3 and 4, such as Silicone Color by Kerakoll Spa. The joint must be clean, dry, free from moisture rising and prepared with a suitable polyethylene foam sub-joint layer such as Joint, to be inserted at a depth of between 2/3 of the joint width and its entire width. One cartridge will cover  $\approx 3$  linear metres for joints with a width and depth of 1 cm.

| Technical Data compliant with Kerakoll Quality Standard |                                                                           |           |

|                                                                              | 6 mm     | 8 mm    | 10 mm   | 15 mm   | 20 mm   |
| 5 mm                                                                         | ≈ 10.4 m | ≈ 8 m   | ≈ 6.2 m | –       | –       |
| 7 mm                                                                         | –        | ≈ 5.6 m | ≈ 4.4 m | ≈ 3 m   | –       |
| 10 mm                                                                        | –        | –       | ≈ 3 m   | ≈ 2.1 m | ≈ 1.6 m |
| 15 mm                                                                        | –        | –       | –       | ≈ 1.4 m | ≈ 1.1 m |
| 20 mm                                                                        | –        | –       | –       | ≈ 1.1 m | ≈ 0.8 m |

If an estimated coverage value has not been given, it means the joint width/depth ratio is outside the specified limits and the joint cannot be sealed.

## Warning

- Product for professional use

→ abide by any standards and national regulations

→ use at temperatures between +5 °C and +40 °C

→ when Silicone Color is used on absorbent substrates such as ceramic, marble, granite and other natural stone coverings, a rim may be left around the edge of the joint. Test prior to application
- uncured Silicone Color releases acetic acid which irritates the eyes and skin. Rinse thoroughly with water in case of contact

→ if necessary, ask for the safety data sheet

→ for any other issues, contact the Kerakoll Worldwide Global Service +39 0536 811 516 - [globalservice@kerakoll.com](mailto:globalservice@kerakoll.com)
